# ALIENS, BIG FOOT, & THE EDGE OF THE WORLD

## JUNE 27TH TO AUGUST 19TH, 2021

Lately, with all the extra time on my hands, I've been tuning into the History Channel and have been learning quite a lot. I never realized that there are teams of archaeologists, scientists, and historians with groundbreaking evidence that separates the facts from the bull dingy. For example, did you know that Jesus was married (to Mary Magdalene, of course) and that they had children? That makes perfect sense, because there are so many guys walking around that look just like Him. And, what about all those UFO sightings? The visible proof seen in cave paintings definitely confirms that aliens have been visiting here for thousands of years. In fact, we, the human race, were probably transported here as the result of a planetary catastrophe in some distant solar system which kinda' makes us aliens. Elon Musk is well ahead of the game here, since the Earth is quickly becoming uninhabitable, although Mars isn't the best choice. And, if the Earth is really flat, that just intensifies our immediate need to find a more suitable spherical planet. And then, there's Big Foot. Well, I've never seen him myself, but I know that the people who have tell the exact same story — very tall and hairy, with enormous feet, but extremely camera shy. The Big Foot mystery will soon be solved, because, as I write, drones are scanning forests worldwide. And, while we're on the "Green" subject, global warming?— c'mon... everyone knows that AOC is behind that as well as the COVID vaccine plot to infiltrate big government mind control.
